

**West Norfolk  
Training today's young people for tomorrow's technology**

#### COVID 19 Update

Following the anticipated closure of schools last Friday, we had taken the view that we should remain open to support those children who were considered vulnerable or who had parents in key occupations.

We have therefore opened our doors for this week and have been trying to establish the number of young people who would be accessing the centre. Schools have been contacted and we have only been able to confirm that 2 young people would be attending.

With the reduction of young people accessing the centre it has been necessary to take the following action.

- **With effect from Friday 27<sup>th</sup> March 2020 will close to students.**

Any further change will be publicised via social media and our website. We will be monitoring emails from home and if there are any urgent matters please use the following email address [office@openroadtraining.co.uk](mailto:office@openroadtraining.co.uk).

Please stay safe everyone.
